DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 33, 36-51, and 55-57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Levine (U.S. 6,045,489) in view of Hribar (U.S. 4,146,222). Levine teaches the claimed invention as noted in paragraphs 3 and 5 of the office action dated September 4, 2006. Levine lacks two first variable volume chambers and two second variable volume chambers. Hribar teaches in analogous device providing multiple first variable volume chambers and multiple second variable volume chambers in order to enhance exercise. Hribar teaches an analogous communication passageway to that of the chambers of Levine. It would have been obvious to one of ordinary skill in the art at the time of invention to provide Levine with multiple first and second variable volume chambers as taught by Hribar in order to enhance exercise. With respect to claims 36-51, and 55-57, please note the above cited office action.

Response to Arguments

3. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
